PRODUCT ASSEMBLY

Figure 1.

STEP 1 - Basebar (**Figure 1**)

Layout the parts shown in the diagram and fix together with the connecting parts.

Use brackets CLU-2 and CLU-3 to attach the base frame together with connecting poles CS-1 (2x), CS-2 (2x), CS-3 and the corner CS-4 parts.

STEP 2 - Uprights (**Figure 2**)

Attach the uprights posts (CS-1) using the corner parts (CS-5) and the brackets (CLU-4) on either side of the base frame. Use

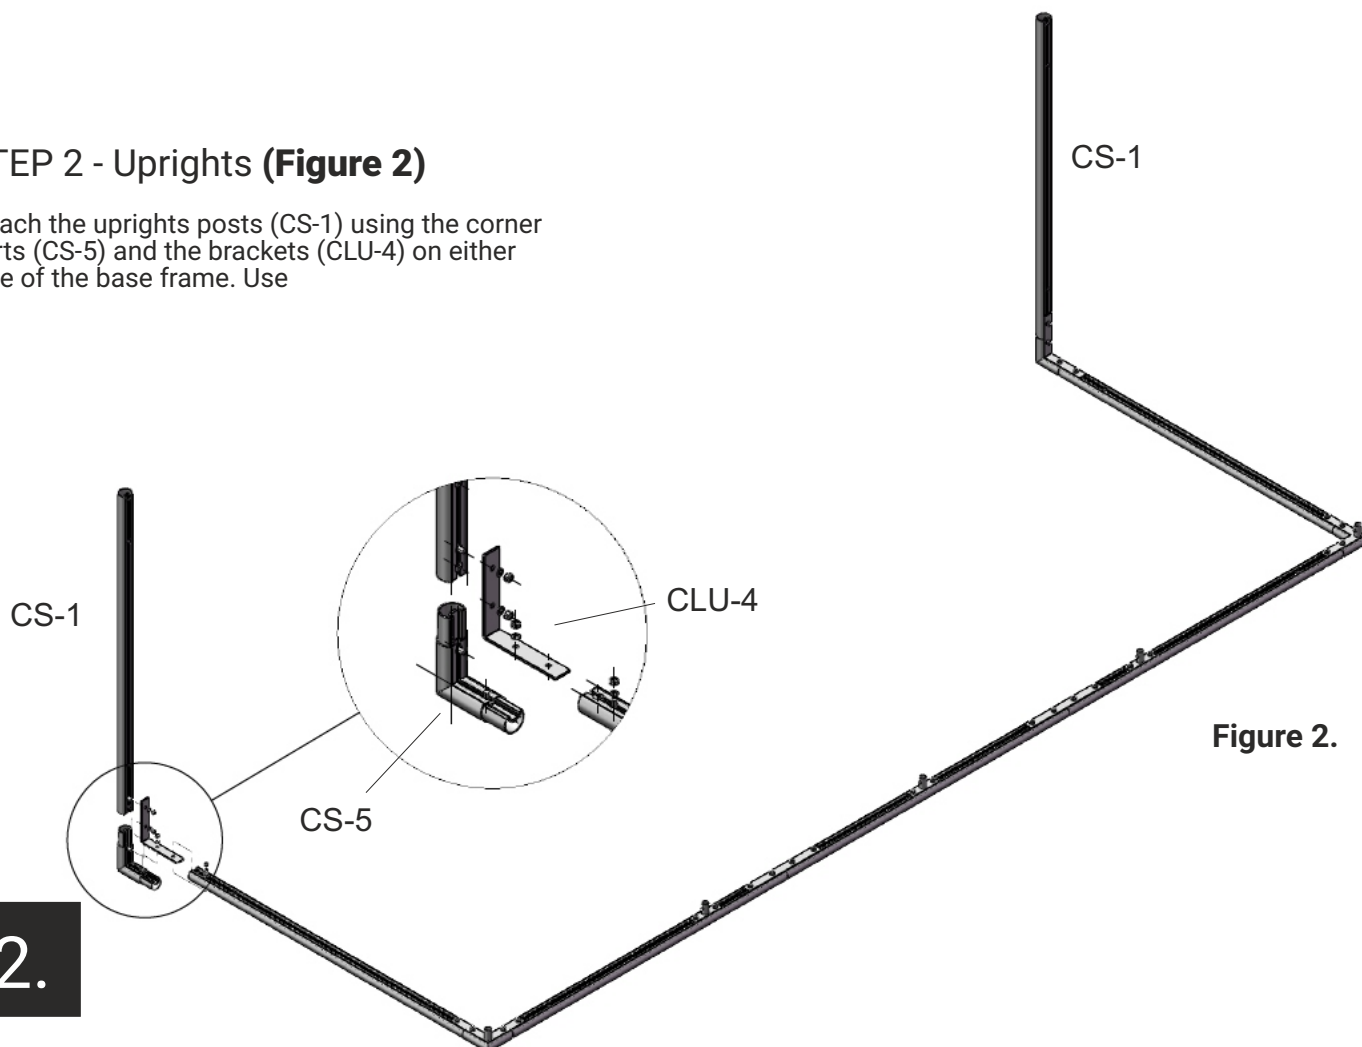

Figure 2.

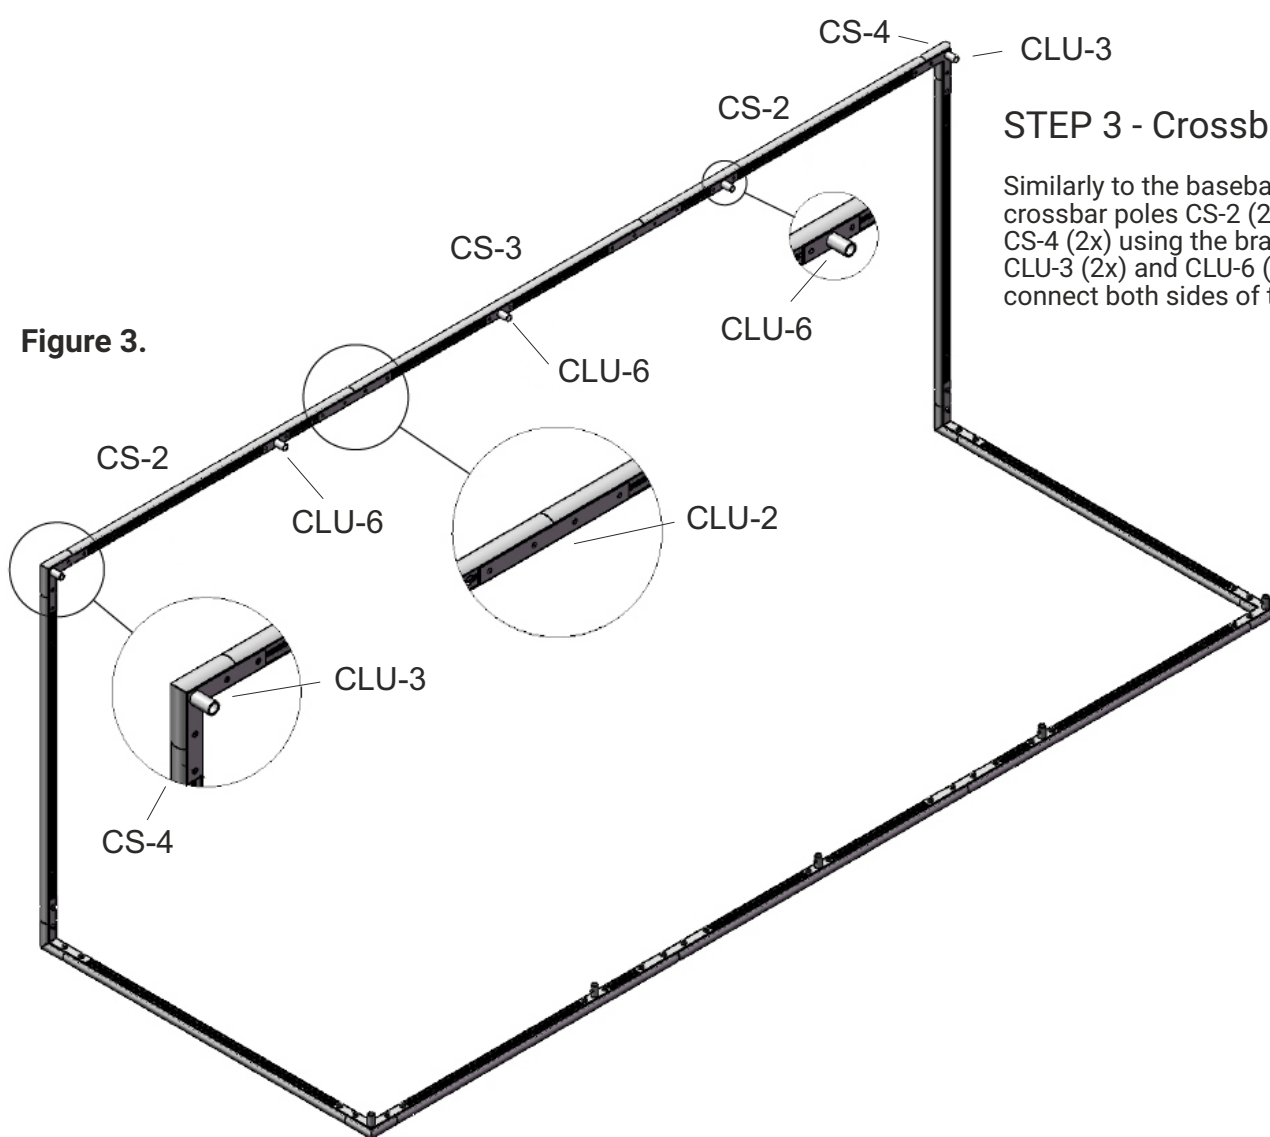

Figure 3.

STEP 3 - Crossbar (Figure 3)

Similarly to the basebar, attach the crossbar poles CS-2 (2x), CS-3 (1x) and CS-4 (2x) using the brackets CLU-2 (2x), CLU-3 (2x) and CLU-6 (3x). Do this to connect both sides of the uprights.

STEP 4 - Back Supports (Figure 4)

Attach a CS-6 pole into the corner bracket on the crossbar and the basebar on either end of the frame. Then connect the CS-6 parts with a CS-7.

The inner supports need a CS-8 to be connected to the brackets on the crossbar and basebar with a CS-7 connecting the 2 poles. (Please see figure 4).

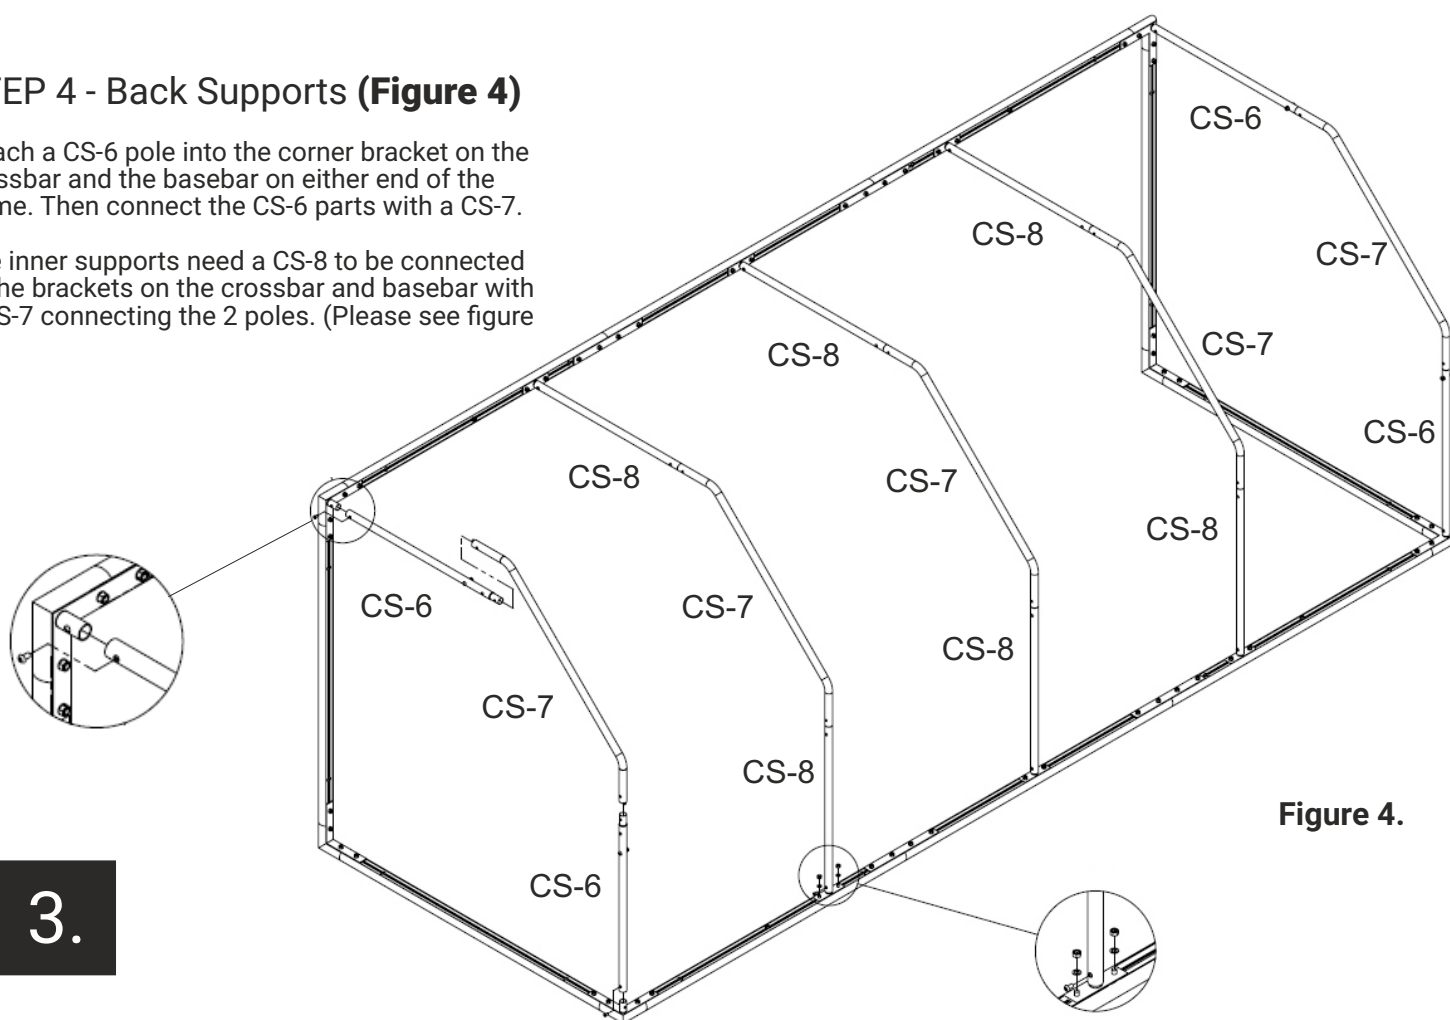

Figure 4.

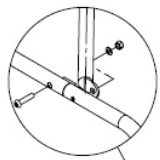

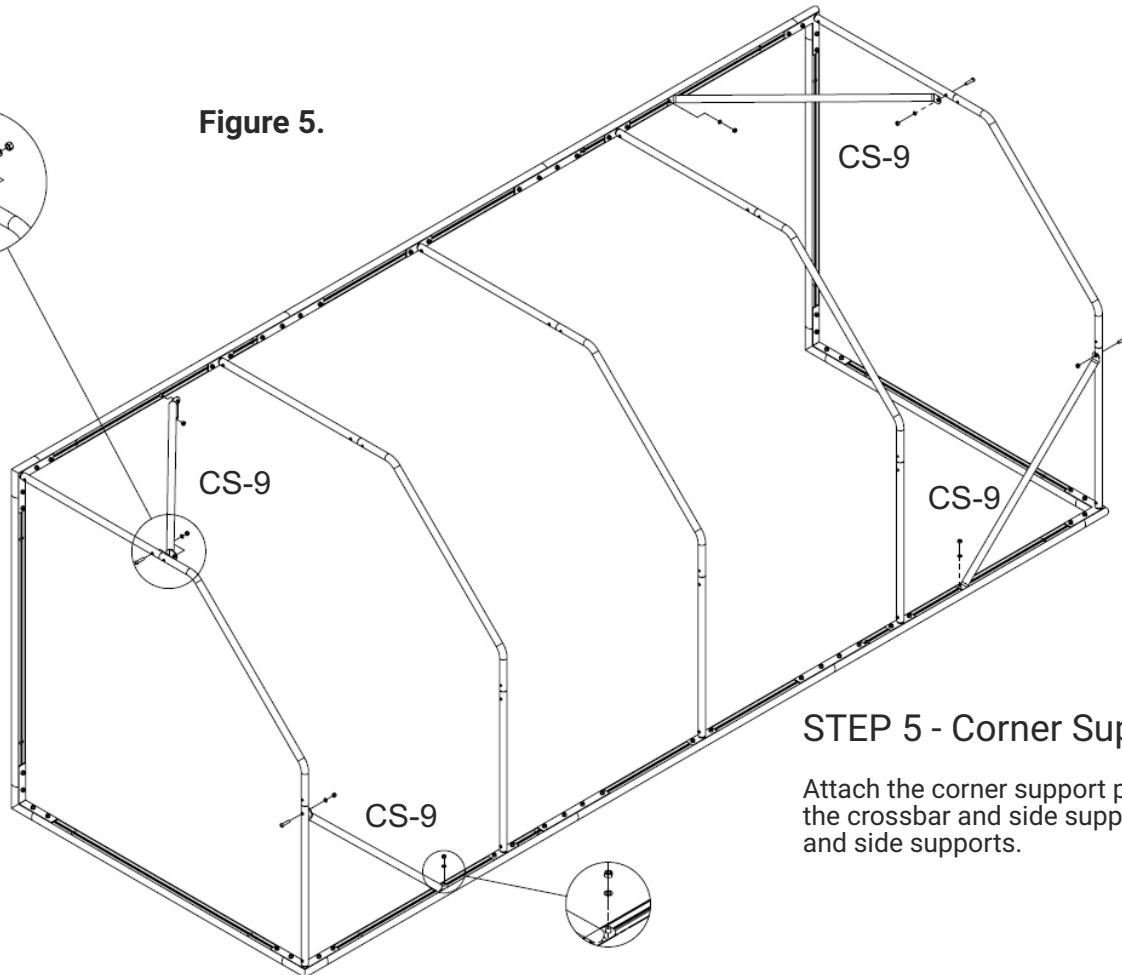

Figure 5.

STEP 5 - Corner Supports (**Figure 5**)

Attach the corner support poles (CS-9) between the crossbar and side supports and the basebar and side supports.

STEP 6 - Wheels (**Figure 6**)

Attach the wheels underneath the base frame. Fix the wheels without brakes to the front underneath either side of the frame towards the crossbar.

Then fix the 3x wheels with brakes along the back basebar as shown in figure 6.

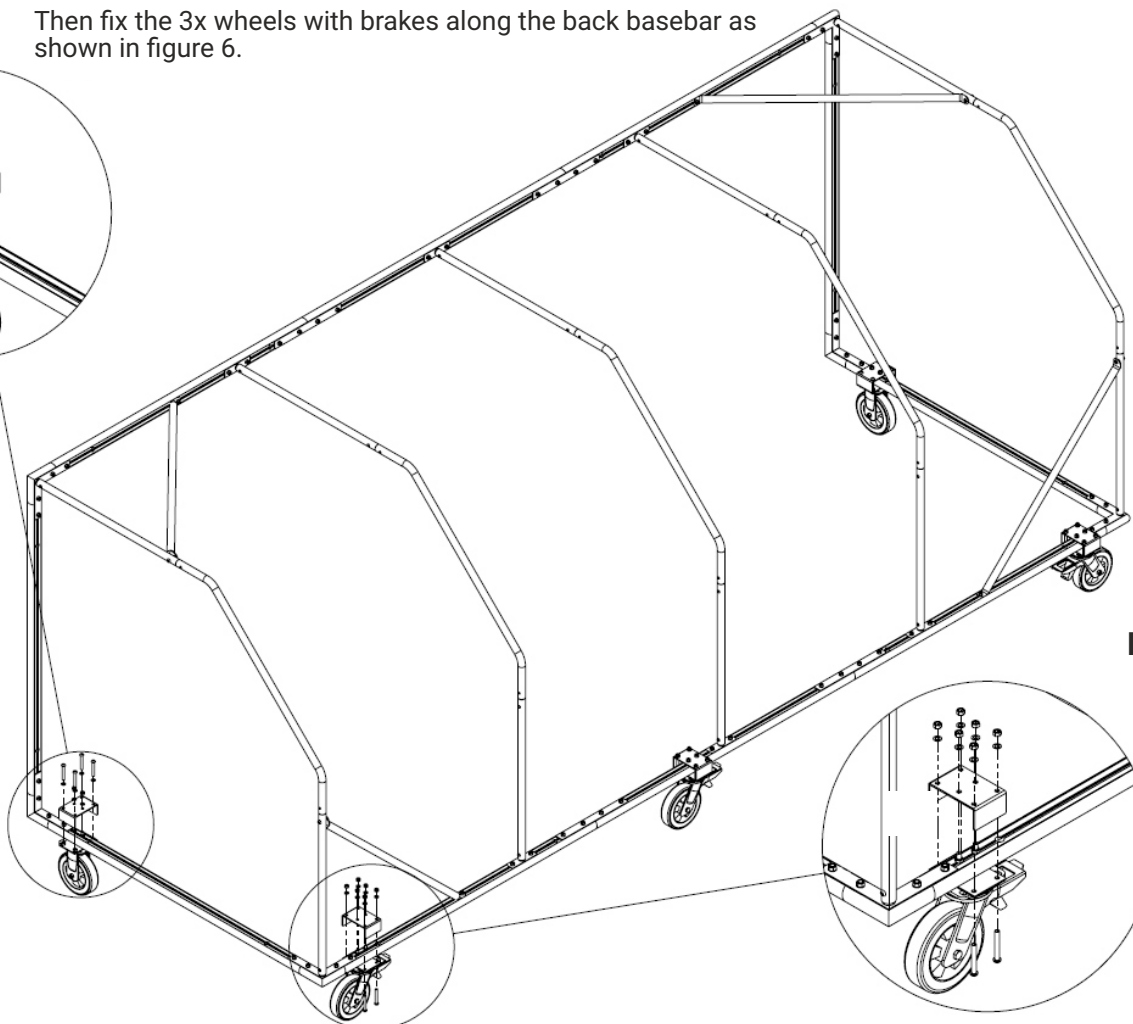

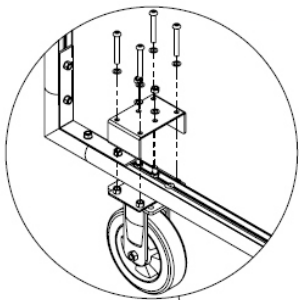

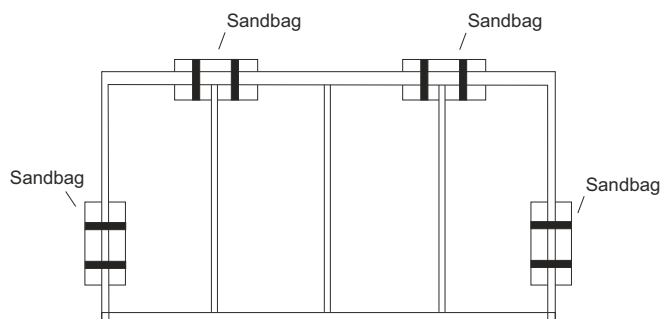

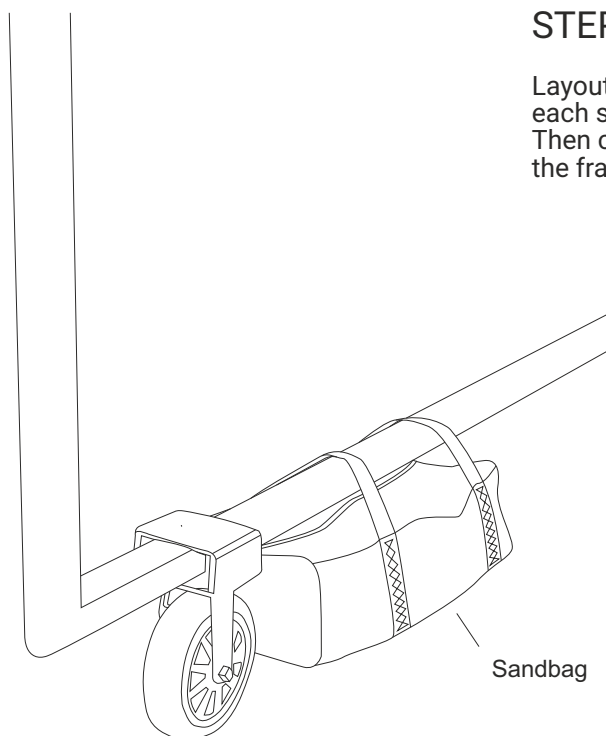

Figure 6.

STEP 7 - Sandbags (Figure 7)

Layout the sandbags underneath the frame, 1x on each side and 2 evenly along the back basebar. Then clip the straps over the top of the basebars of the frame.
